

STATUS: SUCCESSFULLY IMPLEMENTED

FBA Box Contents is a gated Tools converter under Tools → FBA Box Contents. Authorized users upload an Amazon FBA Carton Detail Excel dump and download a typed workbook with Box Contents (plus quantity pivot) and Dimensions.

WHAT IT DOES

FBA Box Contents turns Amazon’s Carton Detail report into a warehouse-ready Excel workbook. Staff stop re-keying UPC / box / qty pivots by hand and get consistent typed columns for packing checks and downstream freight or inventory work.

BUSINESS VALUE

Seconds instead of manual carton unpacking in Excel
UPCs as text keep leading zeros; numbers stay calculable
Built-in quantity pivot by UPC × box
Gated to named warehouse / ops users + superadmin

HOW A CONVERSION WORKS

Step	What happens
1. Open tool	Sidebar Tools → FBA Box Contents (allowlisted + superadmin only)
2. Upload	Drop or browse an Amazon FBA Carton Detail .xls / .xlsx / .xlsm (max 15 MB)
3. Generate	Server parses carton blocks (Carton# → lines → Total)
4. Download	Receive FBA Box Contents Output.xlsx (or shipment-named file) with two sheets
5. Use	UPCs stay text; box # / qty / dims are true Excel numbers for pivots and freight work

OUTPUT SHEETS

KEY RULES

Sheet	Contents	
Box Contents	UPC (text), Box #, QTY + Sum-of-QTY pivot from column G	Input must be FBA Carton Detail Excel (.xls / .xlsx / .xlsm) Max upload size 15 MB Repeating Carton# blocks drive box numbers and item lines
Dimensions	Box #, Weight (rounded up), Length, Width, Height	Audit: fba_box_contents.generate download events

COLUMN TYPES & STYLING

Field	Excel type
UPC	Text (@) — leading zeros preserved
Box # / QTY	Number (General)
Weight	Number; item weights rounded up to 1 decimal
Length / Width / Height	Number from carton header
Headers	Bold + mauve fill #E0B0FF (data types unchanged)

WHO HAS ACCESS

User	Access
Allowlisted emails	sunshine@, stephanie@, paolo@, paulo@, johnbernard@ (metroshoewarehouse.com)
Superadmins	Full FBA Box Contents access
All other users	No sidebar link; route + API blocked

TECH NOTES

API: POST /api/v1/fba-box-contents/generate
 UI gate: fbaBoxContentsAccess.ts
 Backend allowlist: fba_box_contents_allowed_emails
 Keep frontend + backend allowlists in sync
 Stateless convert — no DB table required

ROLLOUT CHECKLIST

Confirm FBA Box Contents appears under Tools only for allowlisted emails + superadmin
 Upload a real Carton Detail export; Generate; open the workbook
 Verify Box Contents UPC column is text; Box # / QTY are numbers
 Confirm pivot block starts at column G and totals match QTY sum

Check Dimensions sheet: one row per carton; weight rounded up
 Reject a .csv or empty file; confirm clear error message
 Non-allowlisted user: no sidebar entry; API returns restricted
 Headers show bold mauve (#E0B0FF) without changing cell types

NOTES FOR LEADERSHIP

Shipped on web / desktop app version 3.5.0 (header styling follow-up in 3.5.x)
 Route: /fba-box-contents · Sidebar: Tools → FBA Box Contents
 Allowlist lives in backend config + matching frontend fbaBoxContentsAccess.ts (keep in sync)
 Complements Shipment Manager (SKU compile) and FNSKU Pack Station (scan sheet) — does not replace them
 Does not touch Keepa jobs, Daily Runs, MAP, or Label Station catalog
