

STATUS: SUCCESSFULLY IMPLEMENTED

FBA Box Contents is a gated BC Tools converter under BC Tools → FBA Box Contents. Authorized users pick NFA and SMW Tool, OBZ Tool, or DNK Tool (Carton Contents List + Manifest Compare), upload a vendor carton file, and download a typed Box Contents workbook.

WHAT IT DOES

FBA Box Contents turns vendor carton exports into warehouse-ready Excel workbooks. Staff choose the matching panel for NFA / SMW, OBZ, or DNK instead of re-keying UPC / box / qty pivots by hand. DNK also compares Box Contents to the Amazon manifest and downloads a corrected file.

BUSINESS VALUE

- One gated page for three vendor carton formats
- Typed columns stay pivot-ready (UPCs as text; qty / box as numbers)
- DNK Manifest Compare remaps Old SKUs and tops up the last box
- Allowlisted warehouse / ops users + superadmin only

HOW A CONVERSION WORKS

Step	What happens
1. Open tool	Sidebar BC Tools → FBA Box Contents (allowlisted + superadmin only)
2. Choose panel	Expand NFA and SMW, OBZ, or DNK (independent accordion panels)
3. Upload	Drop or browse the matching vendor Excel (.xls / .xlsx / .xlsm, max 15 MB)
4. Generate / Compare	Server parses cartons and builds the typed workbook (DNK Compare also remaps Old SKUs vs the manifest)
5. Download	Receive a shipment-named .xlsx; re-download or Clear without leaving the page

TOOLS AT A GLANCE

Tool	Input	Output
NFA and SMW Tool	Spaced-column carton dump starting with PO#:	Box Contents + Dimensions (Weight from Total row as text)
OBZ Tool	Oboz Packing Slip by Carton	Box Contents only (Box Number, UPC, Qty + Total + pivot)
DNK Tool — CCL	DNK ... CCL.xlsx (Contents + Dimensions sheets)	Contents + Dimensions (Box Number, UPC, Quantity)
DNK Tool — Compare	DNK Box Contents + Seller Central Box packing information	Corrected workbook (Old SKU remap + last-box top-up)

NFA AND SMW TOOL

Shared converter for North Face (NFA) and Smartwool (SMW) spaced-column carton dumps. One UI panel; one API (internally Tool #2).

Item	Detail
API	POST /api/v1/fba-box-contents/generate-tool2 (audit: fba_box_contents.generate_tool2)
Input	First row PO#: / shipment id; blank spacer columns between Sku, UPC, Qty, Weight, dims; each carton Carton#: → lines → Total
Box Contents	UPC (text), Box Number, QTY (numbers); Sum-of-QTY pivot at column G; no Total QTY footer
Dimensions	Weight (copied from Total row as text, often with a leading space), Length, Width, Height — no Box # column
Download	{filename} Output.xlsx (e.g. FBA19PLBV097 Output.xlsx)

OBZ TOOL

Oboz Packing Slip by Carton → single-sheet Box Contents workbook (no Dimensions sheet).

Item	Detail
API	POST /api/v1/fba-box-contents/generate-obz (audit: fba_box_contents.generate_obz)
Input	Packing Slip sheet; each carton starts with Carton + number, then PO / UPC/GTIN / Qty header and one line per unit
Box Contents	Box Number, UPC, Qty; bold Total with =SUM(...); Sum-of-Qty pivot from column F
UPC rule	GTIN kept as text with leading zeros stripped (e.g. 00840... → 840...)
Download	{PO} Box Contents.xlsx (e.g. FBA19PZSB42B Box Contents.xlsx) — no Dimensions sheet

DNK TOOL

Two steps in one accordian: Carton Contents List converts a DNK CCL workbook; Manifest Compare & Correct reconciles the result to Seller Central packing info.

Item	Detail
CCL API	POST /api/v1/fba-box-contents/generate-dnk (audit: fba_box_contents.generate_dnk)
CCL input	... CCL.xlsx — Contents sheet (Carton Contents title; markers like 1 of 2; skip Carton Total) + Dimensions sheet
CCL output	Contents: Box Number, UPC, Quantity + Sum of Quantity pivot at G. Dimensions: Order, Carton, Weight, Length, Width, Height
Compare API	POST /api/v1/fba-box-contents/compare-dnk (audit: fba_box_contents.compare_dnk)
Compare inputs	1. DNK Box Contents.xlsx · 2. Seller Central Box packing information.xlsx
Compare rules	Manifest is source of truth; Old SKU remaps from catalog; shortfalls appended to last box; adjustments highlighted yellow; E-G summary
Downloads	CCL: {id} Box Contents.xlsx · Compare: {id} Box Contents - corrected.xlsx

WHO HAS ACCESS

TECH NOTES

User	Access	UI: FbaBoxContents.tsx accordion panels
Allowlisted emails	sunshine@, stephanie@, paolo@, paulo@, johnbernard@ (metroshoewarehouse.com)	Gate: fbaBoxContentsAccess.ts + fba_box_contents_allowed_emails Keep frontend + backend allowlists in sync Generate converters are stateless (no DB table)
Superadmins	Full FBA Box Contents access	DNK Compare uses Old SKUs catalog lookup Rate limit: 20 uploads / hour · max 15 MB
All other users	No sidebar link; route + API blocked	

KEY RULES

Excel only (.xls / .xlsx / .xlsm); pick the panel that matches the vendor file format

NFA and SMW share one tool — do not use OBZ or DNK panels for those dumps

OBZ strips GTIN leading zeros; NFA/SMW and DNK keep UPC text as provided

DNK Compare treats the Amazon manifest as source of truth for quantities and SKUs

ROLLOUT CHECKLIST

Confirm FBA Box Contents under BC Tools only for allowlisted emails + superadmin

NFA/SMW: upload a PO#: spaced dump; verify Box Number pivot and Dimensions weight as text

OBZ: upload Packing Slip by Carton; confirm leading zeros stripped and Total =SUM formula

DNK CCL: upload ... CCL.xlsx; open Contents + Dimensions

DNK Compare: Box Contents + SC manifest; confirm Old SKU remap + yellow last-box adds

Reject a .csv or empty file; confirm clear error message

Non-allowlisted user: no sidebar entry; API returns restricted

Audit log shows generate_tool2 / generate_obz / generate_dnk / compare_dnk

NOTES FOR LEADERSHIP

Shipped on web / desktop app version 3.6.2 (multi-tool panels: NFA/SMW, OBZ, DNK CCL + Compare)

Route: /fba-box-contents · Sidebar: BC Tools → FBA Box Contents

Allowlist lives in backend config + matching frontend fbaBoxContentsAccess.ts (keep in sync)

Complements Shipment Manager (SKU compile) and FNSKU Pack Station (scan sheet) — does not replace them

Does not touch Keepa jobs, Daily Runs, MAP, or Label Station catalog
